

## Our Prices

St George's Eye Care has introduced a new model of patient centric eye care working cooperatively with optometrists and GPs to deliver accessible, affordable and comprehensive care for our patients. This new employment model has resulted in significant savings for patients and we list below our retail price for Cataract Surgery and a co-management post operative fee St George's will pay to optometrists and GPs if the patient elects for the one month post operative examination to be carried out by his or her optometrist or GP.

### GST Inclusive

#### Cataract Surgery

- Standard intraocular lens (IOL), per cataract
  - Non standard IOL – these are priced at the difference between standard IOL and non standard IOL prices
- There may also be an additional charge for premium multi-focal and/or toric lenses

**\$3,500.00**

#### Please note

- That those patients with health insurance cover will pay any deductible or co-payment amount in accordance with their particular policy conditions
- That St George's Eye Care, through the St George's Hospital Extended Charitable Benefits Fund may be able to assist some patients who meet the qualifying criteria by providing financial assistance.

#### Co-management fee payable to optometrists (payment temporarily suspended)

- Four week post operative assessment and report

#### Please note

- Your patient will not be charged separately for this visit by St George's Eye Care as it is part of the package fee.
- Following your four week assessment, should you be at all concerned about our shared patient's eye health, please refer them back to us as soon as possible. Again there is no additional cost to the patient
